HTML/CSS:	Fluent
PHP, Laravel:	Conversational
JavaScript, Ajax, Node.js, Angular.js:	Conversational
Python:	Fluent
Model View Controller Architecture:	Conversational
Bash:	Beginner

Hobbies and Interests

- Software and Web Development: I had a passion for 'making' things ever since childhood days. And when I was introduced to the field of computers and programming, it was easy for me to dive into development because of my inherent interest, and fiddle with it.
- Arduino: I've been using arduino since the past 2 months and quite interested to continue in it because of the way it bridges hardware and software.
- Guitar: I've attended music tuitions for 2 years and after that self taught music.
- Apart from that, I'm also quite interested in combining music with technology, and bring out something innovative.
